JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

general sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
Apr. 28	John Wilson.....	Mobile	17	3	0
29	Spero.....	New Orleans	19	3	0
30	Carib II.....	7	0	0
May 2	Habil.....	New Orleans	16	0	0
3	Viator.....do	17	9	0
3	Columbia.....	Mobile	18	3	0

Health conditions and sanitary measures.

The health conditions of this port and adjacent towns and villages are good. The local authorities continue active in their sanitary work and there has been a notable improvement in this direction. The local physicians are required, by municipal enactment, to report, daily, the names and addresses of all febrile cases to the mayor, who in turn reports the same to me with authority to visit the sick. A recent enactment requires that all deaths be reported to the consulate and that I be permitted to see the dead.

The sanitary work has been retarded by the recent hostilities, but all tanks have been properly screened, most of the water barrels have been destroyed or screened, and all water-closets are oiled once per week. The mayor has named an inspector to see that inspection is made thoroughly weekly and that all necessary repairs are made.

Sanitary measures have not been instituted in the adjacent coast towns nor in Utila and Ruatan.

The agents of the several fruit lines have pledged themselves not to permit people to board their vessels while loading along the coast.

Seventy-five Nicaraguan soldiers are quartered here and about the same number of Honduran soldiers are also stationed in other parts of the town. I inspect their quarters each week.

Report from Puerto Cortez, fruit port—Inspection of localities on line of railroad—Sanitary conditions good—Stegomyia present.

Acting Assistant Surgeon Ames reports as follows: Week ended April 27, 1907. Present officially estimated population about 2,400; general sanitary condition of this port and the surrounding country during the week, good.

Inspection was made April 26, 1907, of the following-named places situated on the railroad: San Pedro, Pimienta, and Choloma. All were found in excellent condition. *Stegomyia calopus* were found at all.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
